

# Los Angeles County Wildfire Hazard Severity Zones (2025)

FHSZSRA\_23\_3  
Moderate  
High  
Very High  
LA\_County\_Boundary  
OpenStreetMap

ESRI Satellite

0 100,000 200,000 ft

## Analysis:

- Very High hazard zones cover large portions of the Wildland-Urban Interface in the Santa Monica Mountains and Angeles National Forest.
- Over 40% of LA County falls in High or Very High zones (approximate).
- This highlights the need for improved wildfire preparedness in interface communities.
